NICA RADU-IOAN

ENGINEERING STUDENT

ABOUT

Hello, my name is Radu, and I'm an engineering student at Universitatea „Lucian Blaga" din Sibiu. It is difficult for newcomers to software development to get a job without a four-year degree, but for starters, a summer internship is the most important thing to acquire the necessary knowledge to work in a company as a software developer. A few words about me: although I have little experience in this field, I am motivated to get ahead and willing to work for my goals. I am calm, friendly and enjoy working with other people.
